

Manifesto of Moazam Ali Fakey for nomination onto the ACFE Pretoria Regional Committee

Professional standards are the hallmark of a discipline, further fortified by the pursuit for perfection through ongoing learning and development and the forging of authentic, goal-driven relationships. This is relevant not only in the realm of operational excellence, but also in the mastery of ethical and responsible conduct. These simple, yet effective principles are the stepping stones to avoiding the tarnishing of a profession's reputation, a phenomenon which has become far too commonplace in recent times.

My view is that the ACFE plays a key and fundamental role in realising the high standards of delivery and conduct we seek and is a symbol signifying the epitome of professional excellence in our discipline and, in my opinion, membership to the ACFE should be mandatory for operating in this industry.

To be this symbol, the ACFE has a responsibility to also be representative of all spheres of our country and our continent. My mission is to be an instrument for driving the very important agendas of transformational change, ongoing professional development at the ACFE and across the profession and forging stronger bonds across Africa.

I have been active in the forensic services space for over 15 years now and have gained valuable experience, skills and more importantly I have developed an unrelenting passion for what we do. I have been over the years exposed to the issues and challenges we face as a profession, and I wish to put my passion, my experience and my skills to good use in forging the fraud examination industry of the future. I believe that the attainment of knowledge is a cradle to grave journey and the vital role the ACFE plays in growing and developing our people is something that resonates deeply with me. I bring a fresh approach to change and I believe that I can serve an important role in transforming the ACFE and increasing its accessibility to a wider audience.

I wish to put myself forward for election onto the Pretoria Regional Committee and, should I be elected, I commit my skills and experience to serving the ACFE Board.
